

GEORGE REED IS SLAIN AT JAUREZ

Highly Respected Member of Chihuahua Mormon Colony Slain By the Redflaggers' Band

Salt Lake, Feb. 13.—Elder Anthony W. Ivins of the Council of the Twelve this morning received a telegram from Juarez, Chihuahua, Mexico, stating that George Redd, a member of the Mormon settlement at that place and a Mexican policeman were killed on Monday by redflaggers while trying to recover property stolen from the Redd home. The telegram states that the murderers escaped and also that on the following day five Juarez Mexicans were executed by constitutionalists.

George Redd was the son of the late Lemuel H. Redd of Harmony, Utah. He was a young man with a wife and several children, well liked in the settlement, and well known to Mormons throughout the colonies. He had spent the greater part of his life in Mexico. He is a brother to Lemuel H. Redd, president of San Juan stake.

The telegram received by Elder Ivins is as follows:

George Redd and a Mexican police

man were killed by local redflaggers at Colonia Juarez on Monday, while trying to collect Redd's property. Redd lived 15 hours. The murderers escaped. Next day constitutionalists soldiers executed five Juarez Mexicans, including Camilo Acosta and son.

Camilo Acosta, Elder Ivins said this morning was a Mexican bandit who had disturbed the section about the Mormon settlements a great deal since a year before the beginning of the present revolution.

A scald, burn, or severe cut heals slowly if neglected. The family that keeps a bottle of BALLARD'S SNOW LINIMENT on hand is always prepared for such accidents. Price 25c, 50c and \$1.00 per bottle. Sold by Riter Bros. Drug Co.—Advertisement

Itching, torturing skin eruptions, disfigure, annoy, drive one wild. Doan's Ointment brings quick relief and lasting cures. Fifty cents at any drug store.—Advertisement

MRS. DORA BROCK CLAY HUNT DEAD

Lexington, Ky., Feb. 13.—Mrs. Dora Brock Clay Hunt, who gained national notoriety 15 years ago when she married General Cassius Marcellus Clay, at that time in his ninetieth year, died at her home near here today. At the time of her wedding to General Clay, Hunt was 16 years old and General Clay who was at one time minister to Russia, mounted a cannon and barricaded his home in Madison county in order to prevent any successful attempt on the part of his relatives to stop the ceremonies. The girl left Clay several months after the wedding and since that time was married four times. Clay died in 1905.

AMERICAN MANAGER OF GREAT EASTERN RAILWAY OF ENGLAND

London, Feb. 13.—The Great Eastern Railway company of England has decided to employ an American executive officer in order to bring its system thoroughly up to date. The directorate announced today the appointment of Henry Thornton, general superintendent of the Long Island railroad, as general manager.

In announcing the appointment of Mr. Thornton, Lord Claude Hamilton, chairman of the Great Eastern board, remarked:

Our company has been obliged to go to the United States for a new general manager as at the present time there is a dearth in the British Isles of proficient men for the more prominent positions on British railways.

POULTRY SELF-FEEDER

Device for Fowls to Balance Their Own Ration.

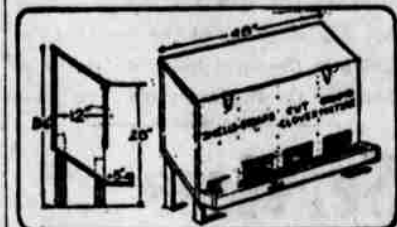

During the Winter Compartments Should Be Filled With Crushed Oyster Shells, Meat Scraps, Clover and Ground Feed.

With the automatic feeder herewith illustrated, the fowls can balance their own ration. It saves care and work for the poultryman. In winter the compartment should be kept filled with crushed oyster shells, meat scraps, cut clover and ground feed.

Grit can be kept in the feeder or fed separately from a smaller one-compartment feeder, and whole grain should be fed in straw to induce exercise, writes J. G. Allabouse, in the Farm and Home. In summer when fowls are on free range, whole grains can be kept in the automatic feeder instead of the clover and ground mixture.

It can be made exactly of the dimensions and plan in the cut, or the idea can be adopted with modifications. There are four equal compartments, three having openings 8x10 inches and one 5x5 inches, the latter for crushed shells. Openings for scraps and ground feed are covered with three-eighths inch mesh netting, and those for shells and clover with one-half inch mesh.

When used for whole grain feeding, strips of wood can be tacked over part of openings if grain feeds too freely. The cover and bottom slant as illus-

Plan and Details of Self-Feeder.

trated, and cover is hinged at lower edge. The trough in front is 1 1/2 inches deep, and a narrow wooden strip should project over into trough about an inch to prevent the feed being wasted. Cover the bottom of trough with tin.

MUCH COMFORT FOR POULTRY

Ohio Man Keeps Laying Hens Busy All Day Scratching for Grain Scattered Several Times.

In our winter poultry houses on cold, snowy days our hens sing and cackle as if they were enjoying summer weather. The house is 14x55 feet, with large windows on the southern exposure. Its equipment consists of clean, inviting nest boxes, self-feeders, with grit and shells, the ground floor banked deeply with leaves and straw, writes George W. Brown of Hancock county, Ohio, in the New England Homestead. We keep the hens busy from daylight until perch time digging after small grain scattered several times daily in the litter. Lawn clippings, meat offal, beets, pumpkins, cabbage and an occasional sheaf of wheat, oats or clover hay suspended from the roof gives them business.

It is the busy hen that lays the eggs. She hustles and has red blood coursing in her veins to keep her warm on cold days. Our perches can be hooked to the roof, and if we have any drones in the flock inclined to spend much of the day on the perch we just hook the perches to the ceiling. They soon get the habit of hustling with the rest of the flock. We have no use for drones on our farm save in our apiary.

SOME DISEASES OF POULTRY

Unsanitary Surroundings, Spoiled Feed, Impure Water and Poor Ventilation Are Among Causes.

Poultry diseases, just like other diseases, are favored by unsanitary surroundings, spoiled food, style and dirty drinking water, and poorly ventilated and insufficiently lighted coops.

Sick birds should be removed from the flock, and dead ones burned, in an outbreak of any disease.

White diarrhea of chicks is caused by a germ which is often passed from the hen to the chick through the egg. Vessels and troughs in which feed is placed should be frequently scalded, or disinfected with a five per cent. solution of carbolic acid.

It is a wise precaution to fumigate your incubator with formaldehyde gas before placing the eggs in it for hatching.

Be careful in introducing new birds into your flock to see that they are perfectly healthy, and not likely to bring disease with them.

Farmer Poultry Points. Feathers are all right; pure-bred fowls are all right; but the question is, shall the farmer make feathers and fancy points of primary or secondary importance? It is no use talking about fancy points, or about standard of perfection, unless we can show the farmer that there is some connection between them and the productive qualities. He is not concerned about such things. He is concerned about supplying the market with poultry and eggs.

Ability of Average Hen. The average hen lays about 80 eggs a year, but a fair average which they ought to equal is about twice that.

Are Greenbacks a Menace to Country?

For years, semi-occasionally, some member of congress, or some gentleman connected with the treasury department, has risen up to declare that the greenbacks are a menace and should be retired. At every repetition of that we wondered how much the account of the gentleman is over drawn in some national bank.

When the men who of late years have been so solicitous, lest the sound money of the country may in some way be tainted cry out in that strain, old people are forced to remember that when the government, under the stress of the great war, seemed almost lost, these same gentlemen or their fathers had locked up their gold and kept it locked up until the clouds began to lift and then came forward and forced upon the government a national bank system founded on the country's debts instead of upon its assets, the intention being to keep the people paying interest forever, and so graded that the richer the country become the more interest would the people be obliged to pay.

Before this benevolent plan was incubated to have some kind of a circulating medium on which the government and people could do business the government issued its promises to pay. These promises were called greenbacks. There was nothing behind them but faith in the integrity of the government and the property of the people. Vast amounts of them were issued, but after the war was over the government began to call them in and finally had destroyed all but \$334,000,000 of them and secured their redemption by placing \$100,000,000 in gold in the treasury, which was 30 per cent of their whole amount. Behind that was all the property of the great republic. Since then those greenbacks have been the hardest worked money

in the country. At the time the arrangement was made the population of the country was, in round numbers 40,000,000 souls, which gave the people per capita \$3.33 in greenbacks.

At the same time the government would give a man or a firm a charter for a national bank for \$100,000, provided the man or the firm would moreover advance to the man or firm \$90,000 of its own notes to do business on the \$100,000 deposited.

But it stipulated that the bank of the man or firm must, in a few reserve cities, keep on hand twenty-five per cent of the money deposited in it, on all other places fifteen per cent; Salt Lake City is a reserve city; here a national bank must retain on hand twenty-five per cent of its deposits; in Ogden, which is not a reserve city, fifteen per cent.

Thus it will be seen that the government, when the population was 40,000,000 secured its own notes by a deposit of thirty per cent of their face value in gold.

Since then the population has increased more than 140 per cent; the property of the country more than 400 per cent and still we were told up to the passage of the late new currency law that those \$334,000,000 in greenbacks were a terrible menace. Why? Simply because no one was drawing interest on them. Suppose the government had been as generous with itself as it has been by national banks and when the Panama canal, costing \$340,000,000 was to be paid for issued \$340,000,000 in greenbacks, placing another \$100,000,000 in gold in the treasury to secure there payment, paid them out to employees and paid for the canal out of the treasury. It would have saved the \$340,000,000 which the canal cost and \$340,000,000 in interest which will be paid on the canal bonds.

Suite 5-9 Commercial Block Phone 70 - 14 West Center

A heavy cold in the lungs that was expected to cure itself has been the starting point in many cases of disease that ended fatally. The sensible course is to take frequent doses of BALLARD'S HOREHOUND SYRUP. It checks the progress of the disorder and assists nature to restore normal conditions. Price 25c, 50c and \$1.00 per bottle. Sold by Riter Bros Drug Co.—Advertisement.

OPEN-FRONT POULTRY HOUSE

Door is Placed on South Side of Building to Get Away From Cold Winds During Winter.

We are firm believers in the open-front poultry house, but we do not like the door at the end on account of the winds howling around the corner in winter. Instead we have a door on the south side of the house, writes Mrs. M. Reck in the Farmers Mail and Breeze. We use a two-piece door and like it much better than the one-piece. In the illustration the lower door is closed and the upper door open. We have nailed lath to the top of the lower door to keep the chickens in. If it gets too cold in winter the upper door is also closed. The open front, shown in the large rectangular space, is covered with canvas. The roosts are hinged to the back of the build-

South Front Showing Two-Piece Door.

ing. When cleaning out the droppings or in winter when we want to keep the hens off the roosts we raise and fasten them to a hook in the ceiling. The foundation is of concrete.

THE COST OF HUNT FOR LOPEZ HAS BEEN AN EXPENSIVE ONE

Salt Lake, Feb. 13.—To date the county has paid bills aggregating \$19,727.96, covering expenses incurred by the Rafael Lopez man hunt. This amount does not cover all of the expenses of the chase for the Mexican desperado, who is believed to have escaped after killing six men. The entire cost of the chase will total over \$20,000 it is believed. More bills will be paid next month according to the county auditor.

LORD DECIES LOSES HIS COMB AND BRUSH

San Francisco, Feb. 13.—Lord Decies had to part his hair today with his wife's comb. On the way to his hotel last night, a dress suit containing his shaving utensils, brushes and comb, was lost or stolen. He reported the loss to the police today.

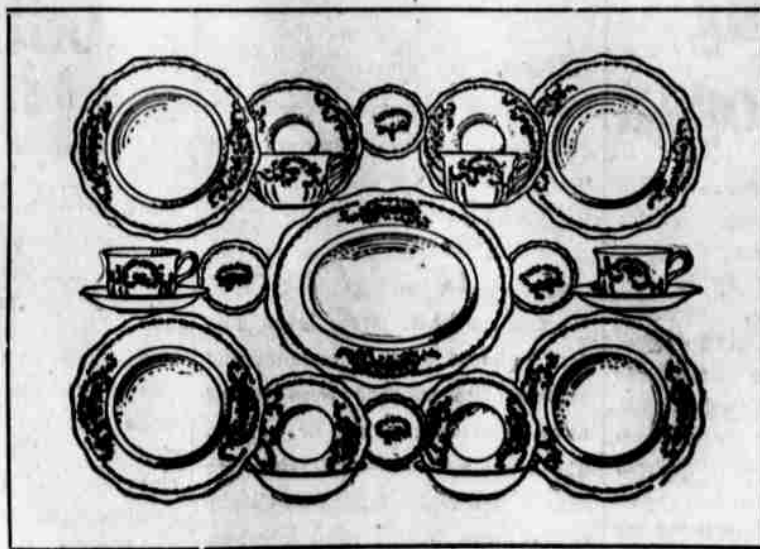

Lord Decies and his wife who was Miss Vivien Gould, daughter of G. Jay Gould of New York is touring the country in a private car. He arrived from Salt Lake City last evening and expects to go to Los Angeles in a few days.

THE SENATE PASSES NAVY BILL

Washington, D. C., Feb. 13.—The bill to create six vice admirals in the navy was passed today by the senate, and now awaits action by the house. Their salaries were fixed at \$11,000 a year and the age of retirement at 65 years.

Diamonds in a Vacuum. A four or five carat diamond, if placed in a vacuum, emits as much light as a candle. And the color of the light varies with its facets. A ruby in a vacuum looks as if it was on fire. An emerald shines with a crimson glow.

Would You Like to Be Made a Present of This Elegant Set of Chinaware?

The above is a cut of a twenty-three piece dinner set. We have a limited number of sets and

we will give you one, Mr. Subscriber,

on condition you will pay for your subscription one year in advance and for \$1.00. The sets are well worth \$3.00 at any china store.
